## Contemporary Work.

### PHILOSOPHY

The Humboldt Film and Video Festival, the oldest student run film festival in the United States, seeks to provide a forum for the presentation of personal expression through the use of film and video. The festival, open to all student and independent film and video artists, includes a series of lectures, workshops and film screenings. Artists, students and the public converge to view and discuss some of the most innovative and exciting contemporary work in the media arts. The festival seeks work by independents which reflect the complexity of their personal vision, skill and involvement in the medium of film and video.

### AWARDS AND PRIZES

\$3,000 total, including cash prizes and professional services awarded at the discretion of the judges. Special award categories include young filmmaker (under age 18), social and/or environmental awareness, and the Salvador Dali Memorial Award for the best in surrealist film.

The Humboldt Film and Video Festival is presented by the Theatre Arts Department and Associated Students of Humboldt State University.

Festival Directors: Vincent Ray Booth, Heather I. Denton and Stephanie Welch
